Programming and Playback Features

Hi-Fi Stereo Sound with Built-In MTS/SAP Decoder

Record stereo videotapes from stereo sound sources and playback pre-recorded hi-fi stereo tapes in hi-fi stereo sound using two audio heads and four video heads. Delivers an excellent 90dB+ dynamic range–through a stereo-equipped TV or regular TV and stereo hi-fi home audio system. The built-in MTS/SAP decoder allows reception and recording of off-air television stereo broadcasts and second audio program transmissions, where available. Back-up memory logic retains the cable channel guide map indefinitely even during a power failure or when the VCR is disconnected from its power source.

VCR Plus+C3™ Easy Taping with Cable Box Control

Simplifies VCR programming by allowing you to simply enter PlusCode® programming numbers, for both regular and Cable TV channels, found in many published television listings. When recording begins, your VCR automatically selects the proper TV channel and program length. Back-up memory logic retains the cable channel guide map indefinitely even during a power failure or when the VCR is disconnected from its power source.

Auto DBS RecordLink™

If you own a satellite dish, this is the feature you've been waiting for. Set your DBS receiver to turn on and tune in to a specific program and it will automatically turn on the VCR in the record mode and then turn off when the DBS receiver turns off. The secret is in the A/V input jack panel. It senses the presence of a video signal…and the rest is history.

Picture

Crystal Clear™ Video

Guaranteed best picture possible regardless of tape condition. Philips delivers a perfect combination of the following technologies to maximize your viewing experience:

Digital Studio Picture Control
This digital circuit systematically checks tape quality and video condition and then optimizes picture for perfect resolution.

19 Micron Video Heads
Specially designed narrow heads clear up onscreen picture noise and deliver a higher performance quality.

Natural Color
Natural Color gives you a dramatic playback picture by sharpening edges, making color details visible, and removing color noise.

Studio Tracking System
The best solution for enjoying the same excellent picture and sound quality with rental/purchased tapes as with personal recordings.

Special Effects

Turbo Drive

The new Philips Turbo Drive cuts fast forward and rewind time in half (about 100 seconds for T-120 tapes) using a microprocessor to measure tape wheel revolutions. This reduces waiting time between playback for the utmost in speed and convenience. This advanced drive also include an intelligence system that provides a built-in warning in case of dirty heads, plus a tape position indicator with real time counter and tape remain.

Remote

VCR/Universal TV/CBL/DBS Remote (Remote # PJVM2.2M)

Multifunction infrared remote controls all operating features and functions of this VCR, plus select functions of most Philips, Magnavox and some competitive brand television sets, as well as some cable converter/decoders, and standard features of Philips, Magnavox, RCA, and Sony, digital broadcast satellite receivers. Change channels fast with the numeric direct access keypad and heads-up onscreen display for confirmation.
